Senior Software Engineer Assessment

Candidate: Rahul Sharma
Date: October 30, 2026
ID: sample-report-en-001

COMPREHENSIVE EVALUATION REPORT

Executive Summary

Overall Score: 92 / 100 (92%)

Candidate demonstrated exemplary architectural problem-solving and clean code discipline. Strong technical depth in distributed systems and cloud security.

System Design & Architecture

Demonstrated high competence in designing fault-tolerant, horizontally scalable event-driven services. Appropriately applied idempotent request handlers and circuit-breakers.

Recommendations / सुझाव:

- Further explore database connection pooling tuning under high concurrency.
- Consider adopting OpenTelemetry distributed tracing across all downstream services.

Security & Data Governance

Follows principle of least privilege, strict Zod schema validation at API boundaries, and timing-safe signature verifications.

Recommendations / सुझाव:

- Add automated dependency vulnerability scanners in continuous delivery pipeline.

Dimension Breakdown

Dimension	Score	Max	%
System Design	48	50	96%
Security	24	25	96%
Code Quality	20	25	80%
